

# MISSION STATEMENT

As an internationally active Swiss company we provide our customers since more than 70 years with solid value-added in the form of innovative high-quality compounding systems and services.

As a global leader in compounding technology we strive to exceed our customers' expectations through dependable partnership.

Our core competencies include the process engineering and constructive design as well as the production of respective plant and machinery.

We ensure customer proximity through local sales and service presence in our key markets.

At all times and at all levels, we focus both in thought and deed on customer benefit.

We place high priority on upholding an impeccable image through exceptional performance, unwavering fairness, and good relations with all our partners.

Our certified processes and work procedures, based on LEAN principles, allow us to provide efficient and high-quality services at all times.

Together with our financially sound and long-term oriented owners, we regard employee commitment, workplace safety, respect for others and the environment as the cornerstones of our daily business.
